

ScoutLink Release Notes

Version 1.3.4 and 1.3.5

1. Changes Impacting All Current Users

ScoutLink v 1.3.5 has seen an update that fixes a date format problem discovered in the Member -> Training Module. It is cosmetic upgrade that does not affect any of the system's functionality.

2. Adult Recognition Awards

A new ScoutLink Application, the Adult Recognition Awards, was released on 28 January 2016. This application has not yet been made available in the Production server.

Due to the confidential nature of the Awards themselves and the nomination process, this application will only be made available to Employed staff as soon as the relevant training has been completed. No other release notes will be associated with this.

As always, please direct feedback and / or suggestions for future enhancements to scoutlink@nsw.scouts.com.au.
